

A Journey of Growth and Prosperity

My name is Panjavarnam, and I live in the village of Allinagaram. I want to share how my life transformed, thanks to the generous support from LTIMindtree, the National Agro Foundation, and the Cauvery Self-Help Group.

Previously, our family income was only ₹5,000, barely covering our basic needs. We dreamed of a better life but lacked the resources to make it happen. Then, I received a ₹25,000 loan through LTIMindtree and the National Agro Foundation, which became the foundation of a new beginning for us.

With this loan, I started manufacturing LED bulbs, producing two types: chargeable and non-chargeable. For the chargeable bulbs, we sell each at ₹350, with a manufacturing cost of ₹300, earning a profit of ₹50 per bulb. For non-chargeable bulbs, we sell them at ₹80, with a cost of ₹50, yielding a profit of ₹30 per bulb. These sales have increased our monthly income to ₹6,500—a meaningful improvement for our family.

This additional income has brought us financial stability and renewed hope. My family no longer struggles with daily expenses, and I am optimistic about growing this business to create a sustainable livelihood for ourselves and our community.

I am deeply grateful to LTIMindtree, the National Agro Foundation, and the Cauvery Self-Help Group for their unwavering support. Their assistance has empowered me to build a brighter future for both my family and our community.
